

Cheese Press 2

Supplies:

- 4 inch diameter PVC tube 8 inches long
- 3/8 to 1/2 Nylon cutting board big enough to cut two 4 inch circles
- 1/4 x 20 threaded rod 12 inches long
- 2 washers
- 2 – 1/4 x 20 wing nuts

Directions:

Cut two circles to fit snugly into the PVC tube.

Drill 6 to 10 tiny hole for drainage in each circle.

Drill one 1/4 inch hole in the center of each circle.

Slide rod through circle and add one washer and wing nut to outside.

Fill tube with cheese curds and slide second circle on top.

Add washer then wing nut and tighten down expelling whey as you go.

Wait a few minute and re-tighten to expel even more whey.
